## SST4 FILM- & PAPER PROCESSOR

**Rotation Processor with electronically controlled tempering bath for all traditional film & paper processing**

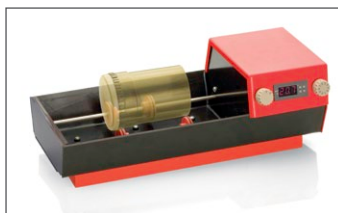

The SST4 Processor is universally compatible with most existing film and paper drums and is suitable for any type of processing of any film or paper: B/W, C-41, E-, RA-4, Pyro and more, all in a the time proven rotation system, offering accurate, repeatable and reliable results. The SST4 features change of direction and torque limiting during start-up (soft start function) which allows for a smooth and streak-free process. The tempered water bath can be set anywhere between 20° and 45° C, featuring a digital interface and large readout. The SST4 does not include any tanks or reels, however tanks and drums of most manufacturers can be used.

### Technical Data

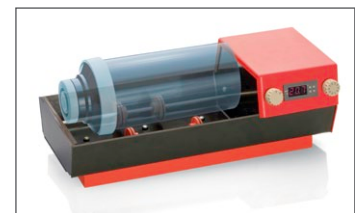

- length: 20 cm
- width: 25 cm
- height: 60 cm
- weight: 6,5 kg
- 240/115 VAC - 50/60 Hz - 0,660 kW
- rotation speed: 20 - 100 rpm (*depends on drum size*)
- jacket bath: ca. 6 Liter
- jacket bath temperature: 20 - 45° C
- jacket bath for drums up to 42 cm (*long version for drums up to 58 cm available*)

for Paterson Tanks

for AP Tanks

for JOBO Tanks geeignet  
(even Expert 3005)
